

**Amendments to the Claims:**

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently amended) A multifunction device, comprising:
  - a body;
  - a media slot placed on the body and which receives a media card; and
  - a control panel including a media card indicator that illuminates when a media card has been inserted into the media slot, wherein the media card indicator and the media slot are on different planes;
  - wherein pressing of the media card indicator places the control panel in a mode to download and print data from the media card.
2. (Original) The multifunction device of claim 1, wherein a cover is placed on the body.
3. (Original) The multifunction device of claim 2, wherein the control panel and the media card indicator are provided on the body.
4. (Original) The multifunction device of claim 1, wherein the control panel extends from the body.
5. (Original) The multifunction device of claim 1, wherein the multifunction device is a flat bed multifunction device, comprising:
  - the body that includes an image forming apparatus in which an image can be formed on a recording medium, the control panel and the media card indicator; and
  - a cover that includes an image reading device that reads an image recorded on a document, wherein the cover is placed on a surface of the body.
6. (Canceled)

7. (Currently amended) The multifunction device of claim 1, wherein the media card indicator blinks when data is retrieved from the media card.

8. (Currently Amended) ~~The multifunction device of claim 1,~~ A multifunction device, comprising:

\_\_\_\_\_ a body;

\_\_\_\_\_ a media slot placed on the body and which receives a media card; and

\_\_\_\_\_ a control panel including a media card indicator that illuminates when a media card has been inserted into the media slot, wherein the media card indicator and the media slot are on different planes;

\_\_\_\_\_ wherein the multifunction device can perform at least one of a copy function, a fax function or a scan function, at least one of the copy function, the fax function or the scan function includes an indicator, and the control panel is in a mode to download data from the media card when the indicator is off.

9. (Currently Amended) ~~The multifunction device of claim 1,~~ A multifunction device, comprising:

\_\_\_\_\_ a body;

\_\_\_\_\_ a media slot placed on the body and which receives a media card; and

\_\_\_\_\_ a control panel including a media card indicator that illuminates when a media card has been inserted into the media slot, wherein the media card indicator and the media slot are on different planes;

\_\_\_\_\_ wherein the multifunction device can perform a copy function, a fax function and a scan function, the control panel includes a copy function key that initiates the copy function, a fax function key that initiates the fax function and a scan function key that initiates the scan function, with a function key associated with a least used function placed between two function keys.

10. (Currently Amended) ~~The multifunction device of claim 1,~~ A multifunction device, comprising:  
a body;  
a media slot placed on the body and which receives a media card; and  
a control panel including a media card indicator that illuminates when a media card has been inserted into the media slot, wherein the media card indicator and the media slot are on different planes;

wherein the multifunction device can perform a copy function, a fax function and a scan function, the control panel includes a copy function key that illuminates during the copy function, a fax function key that illuminates during the fax function and a scan function key that illuminates during the scan function, with the copy function key, the fax function key and the scan function key turned off when the media card indicator is pressed.

11. (Original) A multifunction device, comprising:  
a body;  
a media slot placed on the body and which receives a media card;  
a control panel including a media card indicator that illuminates when a media card has been inserted into the media slot, wherein pressing of the media card indicator places the control panel in a mode to download and print data from the media card.

12. (Original) The multifunction device of claim 11, wherein a cover is placed on the body.

13. (Original) The multifunction device of claim 12, wherein the control panel and the media card indicator are provided on the body.

14. (Original) The multifunction device of claim 11, wherein the control panel extends from the body.

15. (Original) The multifunction device of claim 11, wherein the multifunction device is a flat bed multifunction device, comprising:

the body that includes an image forming apparatus in which an image can be formed on a recording medium, the control panel and the media card indicator; and

a cover that includes an image reading device that reads an image recorded on a document, wherein the cover is placed on a surface of the body.

16. (Currently amended) The multifunction device of claim 11, wherein the media card indicator blinks when data is retrieved from the media card.

17. (Original) The multifunction device of claim 11, wherein multifunction device can perform at least one of a copy function, a fax function or a scan function, at least one of the copy function, the fax function or the scan function includes an indicator, and the control panel is in a mode to download data from the media card when the indicator is off.

18. (Original) The multifunction device of claim 11, wherein the multifunction device can perform a copy function, a fax function and a scan function, the control panel includes a copy function key that initiates the copy function, a fax function key that initiates the fax function and a scan function key that initiates the scan function, with a function key associated with a least used function placed between two function keys.

19. (Original) The multifunction device of claim 11, wherein the multifunction device can perform a copy function, a fax function and a scan function, the control panel includes a copy function key that illuminates during the copy function, a fax function key that illuminates during the fax function and a scan function key that illuminates during the scan function, with the copy function key, the fax function key and the scan function key turned off when the media card indicator is pressed.
